

The Crunchbase Tech Layoffs Tracker

At least 95,000 workers at U.S.-based tech companies were laid off in mass job cuts in 2024, according to our tally, and the cuts have continued into 2025. Follow along here with our comprehensive tech layoffs tracker, updated weekly, of U.S. tech employers cutting jobs — whether that's at companies as large as [Google](#) and [Microsoft](#), or smaller startups.

Last updated: Feb. 28, 2025

Thousands Of US Tech Workers Face Layoffs As Cybersecurity And Healthcare Sectors Report Total Closures, And Manufacturers From Computers To Semiconductors Pare Staff

U.S. tech layoffs appeared to surge this week, with reports of more than 6,000 jobs on the chopping block.

Phoenix-based [Onsemi Intelligent Technology](#) led with a reported 2,400 workers facing job cuts, which works out to about 9% of its workforce.

Other larger cuts came from San Francisco-based design software maker [Autodesk](#), which is also [reportedly](#) cutting about 9% of its workforce, or 1,350 jobs, and Palo Alto-based personal computer maker [HP](#), which said it will lay off up to 2,000 additional workers as part of a restructuring plan announced in 2022 that affected about 6,000 of its staff. Since this is a global cut, it's unclear exactly how many U.S. workers at the 86-year-old company are affected.

Cybersecurity provider [Skybox Security](#) reported it has laid off all 300 of its employees, with 200 of those workers belonging to its U.S. workforce. Based in Israel, the company is in the final stages of liquidating, selling its tech and business to Boston's [Tufin](#). It had previously raised nearly \$335 million from investors, [per Crunchbase](#).

The healthcare sector is also losing another company via a total closure: [HerMD](#), a provider of comprehensive health, beauty and wellness services for women, said it's calling it quits. According to a [report](#), the Cincinnati-based startup cited "ongoing challenges in health care" as the reason for its shutdown and will close its doors on March 21. The startup had raised \$28.2 million from investors, [according to Crunchbase](#).

New additions

The following companies were added to the tracker this week:

- [Autodesk](#)
- [Expedia](#)
- [Google](#)
- [HerMD](#)
- [Hewlett-Packard](#)
- [Ibotta](#)
- [Onsemi Intelligent Technology](#)
- [Skybox Security](#)
- [Zendesk](#)

Tech Layoffs: US Companies That Cut Jobs In 2022, 2023, 2024 And 2025

By the numbers

Layoffs during the week ended Feb. 28, 2025: At least **6,071** U.S. tech sector employees were laid off or scheduled for layoffs, per a Crunchbase News tally.

In 2024: At least **95,667** workers at U.S.-based tech companies lost their jobs in 2024, according to a Crunchbase News tally.

In 2023: More than **191,000** workers in U.S.-based tech companies (or tech companies with a large U.S. workforce) were laid off in mass job cuts.

In 2022: More than **93,000** jobs were slashed from public and private tech companies in the U.S.

Companies with the biggest workforce reductions in 2024

- [Intel](#) [15,062 roles]
- [Tesla](#) [14,500 roles]
- [Cisco](#) [10,150 roles]

Methodology

This tracker includes layoffs conducted by U.S.-based companies or those with a strong U.S. presence and is updated at least weekly. We've included both startups and publicly traded, tech-heavy companies. We've also included companies based elsewhere that have a sizable team in the United States, such as [Klarna](#), even when it's unclear how much of the U.S. workforce has been affected by layoffs.

Layoff and workforce figures are best estimates based on reporting. We source the layoffs from media reports, our own reporting, social media posts and [layoffs.fyi](#), a crowdsourced database of tech layoffs.

We recently updated our layoffs tracker to reflect the most recent round of layoffs each company has conducted. This allows us to quickly and more accurately track

layoff trends, which is why you might notice some changes in our most recent numbers.

If an employee headcount cannot be confirmed to our standards, we note it as “unclear.”

Frequently Asked Questions

— What is a layoff?

A layoff can be either a permanent termination of someone’s employment — usually for cost-saving reasons — or a temporary one because there’s not enough work to justify a full workforce. Tech company layoffs generally fall into the permanent category.

A mass layoff is when a significant number of a company’s employees are cut in a short period of time, often as a result of economic conditions.
